DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/17/2008 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3-11, 13, 15-21, and 23-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Krishman et al (US 2005/0170783; newly cited art).

Regarding claims 1, 3-11, 13, 15-21, and 23-28, Krishman, as shown in figures 6 and 7, teaches a method and apparatus for estimating a channel response from pilot symbols (training symbols) comprising determining an initial channel estimate and the initial channel estimate is iteratively (repeatedly) processed by performing transformation to obtain the enhanced channel

estimate. The enhanced channel estimate is later used for demodulating the received signal. See also paragraphs [0014], [0029], [0040], [0041], [0054] – [0082], [0086] – [0114], [0137] – [0140], and [0145].

Response to Arguments

4. Applicant's arguments with respect to claims 1, 3-11, 13, 15-21, and 23-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References He et al (US 2004/0005010) and Fimoff et al (US 7,035,353) are cited because they are pertinent to the method and apparatus for estimating channel response.
